Career Objective

Detail-oriented B.E. (CSE – AI & ML) student with proven experience in Python development, AI automation, and real-world project delivery. Passionate about building intelligent systems, generative AI applications, and modern web solutions. Seeking an entry-level role as a **Generative AI Engineer**, **AI/ML Engineer**, **Web Developer**, or **Python Developer** where I can apply my skills in LLM integration, automation workflows, and full-stack fundamentals to create impactful, production-ready products.

Education

Bachelor of Engineering – CSE (AI & ML) <i>Sree Vidyanikethan Institute of Technology (SVIT), Hyderabad</i>	2025 – Present <i>CGPA: 7.8 (Pursuing)</i>
Board of Intermediate – MPC <i>Sri Chaitanya Educational Institutions, Hyderabad</i>	Graduated 2025 <i>Percentage: 89.2%</i>
Secondary School Certificate (SSC) <i>Gowtham Model School, Hyderabad</i>	Graduated 2023 <i>CGPA: 10.0 / 10.0 — Perfect Score</i>

Internship Experience

Python Development Intern <i>Cognifyz Technologies</i> - Developed clean Python solutions for real-world problem statements following industry coding standards. - Strengthened problem-solving and logical thinking through end-to-end development workflows.	Remote
Python Development Intern <i>CodeSoft</i> - Built automation programs using Python; enhanced skills in file handling, exception handling, and debugging. - Maintained proper coding practices and technical documentation throughout project lifecycle.	Remote
Python Development Intern <i>CodeAlpha</i> - Completed practical mini-projects applying core Python — functions, loops, and data structures. - Improved debugging and problem-solving skills through iterative, hands-on development.	Remote

Projects

- What The News | AI News Gossification Platform | 24-Hour Hackathon**
- Built an AI-powered news platform converting headlines into multi-style summaries using LLMs and n8n automation.
- Attendance Management System | Python, AI**
- Built role-based secure access with teacher authentication, AI attendance planner, and real-time tracking dashboard.
- Hangman Game | Python CLI**
- Developed a word-guessing CLI game using loops, conditionals, and string manipulation with full game state management.

Technical Skills

Languages: C, Java, Python, HTML, CSS, JavaScript (Basics)
AI & Automation: n8n Workflow Automation, LLM API Integration, AI Content Generation
Developer Tools: Git, GitHub, VS Code, Google Colab
Core Concepts: Data Structures, Object-Oriented Programming, File Handling, Debugging, REST APIs
Soft Skills: Problem Solving, Logical Thinking, Team Collaboration, Rapid Prototyping (Hackathons)

Extra-Curricular Activities

- AI Content Creator — “FactsCrate” | @factscreate1**
- Produce AI-generated short-form videos using automation tools and LLM-powered content pipelines.
- Gaming Content Creator — “Nubee Gamer” | @nubeegamer | 1.4K+ Subscribers**
- Grown a gaming channel to 1,400+ subscribers, demonstrating content strategy and audience engagement skills.

Certifications

Agentic AI	Simplilearn
Introduction to Generative AI	Simplilearn
IBM AI Fundamentals	IBM
IBM Design Thinking	IBM
Outskill Gen AI Master Class	Outskill
Python Essentials 1 & 2	Cisco / NSDC
Reliance Foundation Python	Reliance Foundation
Simplilearn Conditional Statements in Python	Simplilearn
Simplilearn Python for Beginners	Simplilearn
Synapse Certificate	Synapse
Yuva AI Certificate	Government of India
Python Development Internship Certificate	Cognifyz Technologies CodeSoft CodeAlpha
